Course Description:

This production course explores a range of techniques used in manipulating photographic images. Projects offer students experience with techniques for manipulating their own images using workflows such as physical manipulations, seamless compositing, and emerging A.I. image processors. Students will examine the varied uses manipulated photos over time and how those have led to contemporary digital manipulations in various social contexts. Discussions, readings, and workshops will develop a critical understanding of the creative possibilities and develop the skills to ethically consider the altered image. Projects will combine theory and practice, while group critiques serve to advance both. Prerequisites: VM 110, VM 101, VM 120, and junior standing.

This class may count toward the VMA Photography Minor or [Photo BFA Production track](#) with pre-approval. See me individually for more info on this.

Student Learning Objectives:

Upon successful completion of this course, students will:

- Develop an understanding of the history, theory, and practice of photographic manipulation.
- Develop a critical understanding of their own photographic projects via written & live group critiques.
- Establish essential skills in photographic workflows centered on photo manipulation for a variety of media.
- Learn professional standards and techniques for working with available analog & digital technologies.
- Establish an effective workflows for with industry standard software.

Expectations - Adjusted for COVID-19 Mitigation and our Online Course:

Since we are all entering into this **ONLINE Course** voluntarily and from the beginning, you can expect the following:

Students required to complete all assignments on time and attend class as agreed upon. This is a 4 credit course (~4hrs/week) meaning that some of our class will be synchronous and some may be asynchronous. If on Zoom, being present means your camera on at all times and ready to fully participate (or see me during office hours if you have an issue that prevents this). Includes regularly shooting & printing new pictures (or equivalent) and attending each critique with active participation. Coming prepared, with new work or equivalent deliverables to class is required. Students should expect to spend time outside of class for shooting, editing and/or working on new photographs. Students will share work in progress and examples of work that has influenced them, photos, notes, drawings, readings, videos, etc. Each student is responsible for having all required supplies for this course. Check your email daily. I will notify you of any updates or changes to the course during the semester via email.

However, during this pandemic we are all still coping with the effects of this evolving virus, social distancing, teaching and learning in mixed modalities, mastering new technologies and etiquettes, and having varied access to learning resources. **Therefore, everyone's health and wellness will come first in this course, and we will work together to adjust for any unplanned events and/or changing needs as they happen.** I will strive for the most humane and healthy options available. Students must follow all [VMA Covid-19 Guidelines](#) and all college-wide [Covid-19 protocols](#) if on campus. This includes wearing a mask at all times, maintaining social distancing, hand sanitation, etc. If you feel sick for any reason, let me know right away, stay in touch, and follow any college screening protocols including self-reporting and quarantine if necessary. The VMA department requires that students read the [VMA Covid-19 Safety Guidelines](#) and sign safety forms via the [Production Portal](#).

As part of this, we will generally prioritize the most humane option as being the best choice, and will emphasize:

- › Supporting each other as humans
- › Simple solutions that make sense for the most of us
- › Sharing resources and communicating clearly
- › Accessible asynchronous content for varied access and contexts when needed
- › Synchronous and asynchronous discussions to learn together by sharing feedback, ideas, & work in progress
- › Flexibility in realizing that everybody needs support and understanding through this unprecedented time

Grading and Standards:

Grades will be earned in points throughout the semester by completing assignments, critiques and their deliverables. The total points possible and all grading criteria are specified in each Project Description sheet. The three Project Critiques are weighed with the highest values.

The total points earned throughout the term are factored against total possible points into a percentage which determines the Final Course Grade according to this **Course Grade Scale**:

COURSE GRADE SCALE

A	93% - 100%	C+	77% - 79%
A-	90% - 92%	C	73% - 76%
B+	87% - 89% *	C-	70% - 72%
B	83% - 86%	D	60% - 69%
B-	80% - 82%	F	59% and under *

Apart from assignment grading: absences, tardies, leaving class early, and being unprepared can also negatively affect your Course Grade as stated in the following Attendance Policy section.*
